

# Walnut Production with Efficient Irrigation

As of early June, our farmer began monitoring the irrigation data in our system and started irrigating by following the ISL threshold.

**Despite rising temperatures,** both the **irrigation intervals** have lengthened, and the **irrigation duration has become shorter.**

Date	Total Irrigation Duration	Irrigation	Avrg. Weather Temperature °C
1-30 June	91h 40m	24	23,6
1-31 July	72h 5dm	22	26,7
1 - 29 August	64h 10m	23	27
